

## Inventory of Recreation Areas on DNR-managed lands

Key to Existing Use abbreviations:

- **M — Managed Public Access.** Those landscapes where the Washington State Department of Natural Resources (DNR) has an approved Recreation Plan. DNR receives funding from the Nonhighway and Off-road Vehicles Activities (NOVA) account and support from users and grants for public use on these landscapes.
- **UM — Unmanaged Public Access.** DNR does not receive any funding to maintain and manage public access within a landscape. In this vacuum, users have developed their own infrastructure to support their activity with no authorization from DNR.
- **LM — Limited Management of Public Access.** Landscapes where DNR has approved site-specific facilities but has not developed a Recreation Plan. DNR receives limited funding to maintain and manage the approved facilities and use within a landscape. To meet increasing demand, users have also developed their own infrastructure that isn't part of DNR's managed trails and sites.
